

## **INTRODUCTION**

‘Construction PLUS’ is a website; we used ASP as frontend and SQL Server as backend. In which we can get online help of the designers, engineers and Vaasthu experts for the construction of our new houses or buildings etc... In this site we will get the list of contractors, engineers and hardware dealers in our locality. There is a form for entering our ideas or concepts like three bed rooms and facilities which we want for our home or our offices and we will get an estimate to our plan from different engineers. A user can register in this site and if he is a premium user he can view and download different plans for the house or similar constructions. We get the plan and estimate through email. We can apply for the hard copy also. There is a opportunity to contact the desired engineers as per our budget.

There is an option for get the help from the Vaasthu experts. We will get information through email about the exhibitions. There is a facility to buy or sell properties like home; lands etc. user can also view the list of rental and buyable properties. There is an option for premium account users to contact the mediators or owners of the properties. Users can also give the advertisements of their properties.

There is a chance to view and check the cost of the building materials like marbles, cements, bricks, etc and also user can check the dealers of the building materials and articles from the famous engineers and Vaasthu experts.

There is an option to post the jobs and users can also view and contact the right peoples for each works. There will be a detailed list of employees for each work.

## **EXISTING SYSTEM**

In the existing system mostly there are sell & purchase building and sell & purchase plot & rent options.

### **PROBLEMS WITH EXISTING SYSTEM**

- Lack of security of data.
- More man power.
- Time consuming.
- Consumes large volume of pare work.
- Needs manual calculations.
- No direct role for the higher officials.
- Damage of machines due to lack of attention.

To avoid all these limitations and make the working more accurately the system needs to be computerized.

## **PROPOSED SYSTEM**

The aim of proposed system is to develop a system of improved facilities. In this system the features are new construction, interior designing, Vaasthu sashtra, advertisements, sell & purchase building etc..

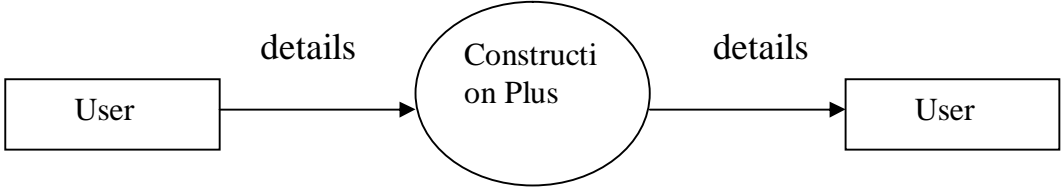

### **ADVANTAGES OF THE PROPOSED SYSTEM**

The system is very simple in design and to implement. The system requires very low system resources and the system will work in almost all configurations. It has got following features

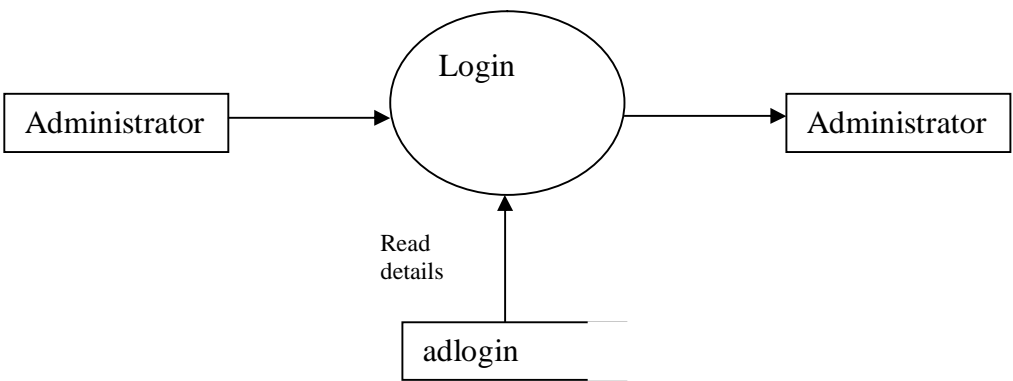

- Ensure data accuracy's.
- Proper control of the higher officials.
- Minimize manual data entry.
- Minimum time needed for the various processing.
- Greater efficiency.
- Better service.
- User friendliness and interactive.
- Minimum time required.

## **MODULE DESIGN**

### **Admin**

The Administrator logs in using the adlogin. In this module two operations are done, one administrator login and second is the user registration, which is done by the administrator. During login the admin and password is verified with that in the database. During Registration the details of the user are taken to store in the database, also a userid is provided to him whose is also stored along with his details.

Along with this the administrator can decide with the status of the user, whether he is to be blocked or unblocked. The administrator also can block a person entering from the system. On receiving any information about a person so he must be prevented from entering the system, the administrator can block him by making his status blocked. So that he is blocked from entering.

The details of the person are updated on request. Firstly his details are procured from the database by using the userid provided to him during the registration. Also the userid is also stored for sending the message.

### **User module**

This module is actually provided for the user, ie: the registered user. Here the user can post his new postings like new construction, sell buildings, sell plots, buildings on rent, etc; he also can be able to access the Vaasthu Sasthra concepts also the interior design concepts too. The user also gets an account on this website with a unique username. He can login to this website using the username and password. He can also post his doubts related with Vaasthu sasthra concepts to this websites and will get the reply through his mail ID

## **Software and Hardware Specifications**

### **Hardware Specification**

Processor	:	Pentium III/AMD Athlone XP
RAM	:	128 MB
Hard disk	:	20 GB
FDD	:	1.44MB
Monitor	:	14 inch
Mouse	:	3 Button scroll
CD Drive	:	52 X
Keyboard	:	108 keys

### **Software Specification**

Operating System	:	Windows 2000/xp
Languages	:	ASP.NET
Backend	:	My SQL
Browser Program	:	Internet explorer/Mozilla Fireworks
